CONCEPT NOTE FOR SCAN FOR A WORD

A bible teaching search engine for SOTM

The Concept

The media space has become dominated by snackable content.

Scan for a Word is a bible teaching search engine that allows users to find the messages that speaks to life issues.

Snackable content are bitesize content that are usually an average of 90 seconds. They usually have the same effect as movie trailers, leading and attracting the audience to desire the full body of content

SEID

The Why

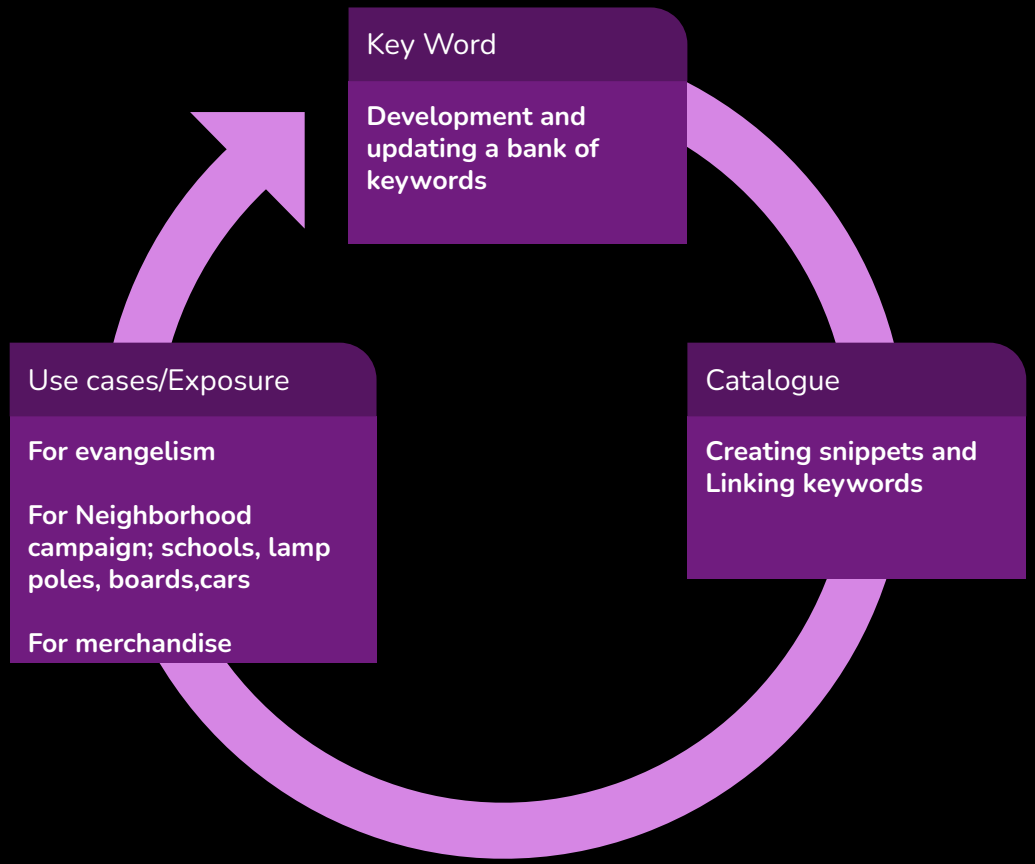
The world is looking for answers, it is why google.com is the most visited website.

With Apostle Segun Obadje's (ASO) huge catalogue of teaching on various subjects and topics, **Scan for a Word** creates an opportunity for users to access teachings and messages with the specific word at any time.

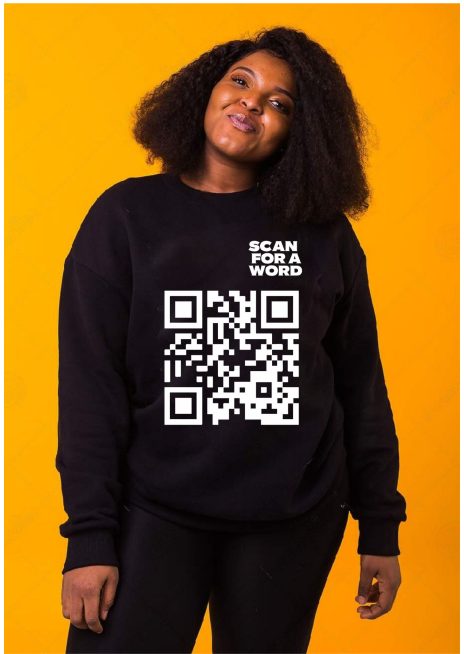
The How

Considering the size of ASO's library of messages, a pragmatic approach to building and linking the catalogue will follow a pattern as seen here.

It's proposed that this pattern is seen and practice continuously.



Expressions



Growth Plan

AI Enable dailyword

A word will be sent to user daily using their preset life experiences

Chatbot

chatbot on different platforms; Whatsapp, telegram,Facebook messenger etc.
